Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Promote value-based programs and better patient outcomes with software that aligns payer and provider contracts and improves quality. Improve quality with actionable insights ClaimSphere Clinical+ assigns accountable ownership of quality measures to providers, empowering providers with real-time, actionable insights on patient-level gaps in care. It can be configured for various value-based programs, such as Healthcare Effectiveness Data and Information Set (HEDIS®), P4P and STAR, and scaled up for MIPS and APMs. Healthcare organizations can easily convert acquired clinical data to pseudo claims that can be consumed by a payer administrative system. Using ClaimSphere Clinical+ providers get actionable clinical intelligence at the point of care by combining clinical and claims data. These features go a long way toward enabling payer-provider convergence. The ability to track provider performance metrics and supplemental clinical data in real time allows healthcare organizations to more accurately evaluate various provider networks. The system also enables organizations to prioritize care gaps based on quality impact and develop performance benchmarks based on peer comparison analytics. ClaimSphere Clinical+ helps organizations collect and analyze medical records from providers quickly and efficiently. This allows closer monitoring of care gaps to improve efficiencies. To drive faster care gap closure, ClaimSphere Clinical+ then charts the results of evidence-based, performance-driven provider incentive programs. Prebuilt workflows for care gaps assignment, abstraction and review are designed to ensure accurate data collection. Multiple documents can be uploaded and accessed simultanously to quickly capture relevant information for medical records. Extend your core administration technology with integrated solutions

----- Arcticle source ----- https://www.cognizant.com/us/en/trizetto/partners ----- Partner alliances Program partner benefits Become a partner Strategic partnerships enhance investment Payer solutions partners TriZetto consulting partner network Benefits Administration partners What partners are saying Become a partner Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Our partner relationships are with leading companies providing software applications, business services, technology products and consulting services to the healthcare market. Expanding the functionality and effectiveness of facets. Delivering complementary software, services and technology for QNXT. Allowing integration and/or facilitated interaction with CareAdvance enterprise. Expanding the solutions that support contract

analysis, claims pricing and value-based-reimbursement administration. Enabling the reliable and cost-effective performance of TriZetto Healthcare Products. Helping to support the administration of Medicare, Medicaid and Dual eligible health plans. Delivering complementary software, services or technology that enhances the functionality and effectiveness of the NetworX line. Qualified, Cognizant-approved consulting network partners deliver TriZetto product expertise and delivery experience to our clients. Manage the cost and quality of care with access to affordable, QicLink-integrated solutions. "We have been a partner of Cognizant for many years and the Cognizant staff, their clients, the effectiveness of the user conferences and the professionally run organization have all contributed to a very successful partnership for almost 20 years. We value our partnership and look forward to many more successful years together." RedCard The Cognizant line of TriZetto Healthcare Products offers five categories of alliances: Software and Content Software technology and content companies provide our clients with value-added software applications and intellectual content that integrate with, complement or connect to the digital systems and technology solutions within the TriZetto Healthcare Product line. Software or content is included in the TriZetto application package or offered separately on a licensed or hosted basis. Business Services Service alliances provide services solutions that complement our digital business and digital operations offerings. These include Business Process Outsourcing (BPO) services such as front-end, claims administration, enrollment, billing and business rules configuration (such as EDI, ID card, print and mail, ERA/EFT and related claims processing services). Digital business services also include 5010 mapping and ICD-9-CM to ICD-10-CM mapping tools. Consulting Services Consulting alliances include external system integrators and consulting companies that provide services related to the custom development, implementation and support of client systems external to the TriZetto line of Healthcare Products and enhance our digital systems initiatives. Distribution Distribution alliances include third parties that offer professional services as part of an integrated TriZetto Healthcare Product solution. These integrated solutions are targeted at market segments that complement our direct sales efforts, such as Government programs or International markets. Development Technology Development technology partners provide the platform upon which TriZetto Healthcare Product solutions are built. Examples: hardware, programming languages, databases, application server environments and EDI services. These partners enable and support our digital technology solutions. In combination with our TriZetto Healthcare Products and Services, the partner solutions we have selected help clients achieve an integrated business model that harnesses the power of digital to enhance revenue growth, drive administrative efficiency, improve cost and quality of care and improve the member and patient experience. If you believe your company can provide solutions that further support our initiatives, please click here When you partner with Cognizant in affiliation with our line of TriZetto Healthcare Products, you partner with a business that has been providing highly effective software and services solutions to the healthcare payer market for more than 30 years. These solutions have helped drive the administrative success of major national health plans, small and regional health plans, provider-owned plans and third party administrators (TPAs), and support an extensive national footprint of client organizations. Businesses whose

software development technology and business, consulting or distribution services complement our own offerings can significantly benefit from this footprint: Our national footprint is HUGE and covers lines of business including Commercial Medical, Medicare, Medicaid, Individual, Dental, Vision and Behavioral. If your organization offers solutions that could potentially enhance those offered within Cognizant's line of TriZetto Healthcare Products and provide added value or an enhanced experience for our payer clients, Contact Us. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Care management: Value-based healthcare Change Healthcare is inspiring a better healthcare system. As a key catalyst of value-based healthcare, we are working alongside our customers and partners to create a stronger, better coordinated, increasingly collaborative and more efficient system, and accelerate the journey toward improved lives and healthier communities. InterQual® solutions align payers and providers with actionable, evidence-based clinical intelligence to support appropriate care and foster optimal utilization of resources. InterQual Connect™ seamlessly integrates InterQual Criteria into Clinical CareAdvance® and CareAdvance Provider® Portal, and TriZetto® Touchless Authorization Processing (TTAP) supports a native integration to InterQual criteria, streamlining the medical review process and enabling the automation of the prior-authorization process. Health and wellness content WebMD Ignite products, integrated with CareAdvance, offer a total population health management solution for your enterprise. This solution

improves health outcomes and reduces cost of care by engaging clinicians and members with shared decision-making tools and behavior change through Clinical CareAdvance®, health coaching and symptom triage for Clinical CareAdvance. WebMD Ignite is the premier growth partner for healthcare organizations, helping guide people to better health from Discovery to Recovery. Clinical guidelines MCG, an integrated partner product, is a series of annually updated, evidence-based clinical guidelines that support the care management of nearly two-thirds of US health plan membership. Access to the Care Guidelines is provided through the integration of TriZetto's Clinical CareAdvance® care management application with MCG's CareWebQI® interactive software, which enables consistent point-and-click care management; easy access to current best evidence; and documentation of variances from best practice. The result is reporting based on real-time data, supporting the elimination of gaps in care, resource delays and other variances. Unlike other clinical criteria alternatives, CareWebQI software provides diagnosis-specific evidence summaries, citations and quality measures. This evidence is integrated within all criteria and content—including detailed care pathways—to support proactive care and the capture of variances from evidence-based best practice. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : OPTUM® Claims Editing System The OPTUM Claims Editing System, an integrated partner product, is a powerful adjunct to the Facets enterprise core administration system. The Claims Editing System is a transparent open-architecture and rules-based application that provides a commercial and Medicare-compliant Knowledge base of edits and utilizes date-sensitive processing to adjudicate both professional and facility claims. The application includes full customization capabilities for software auditing logic as well as data relationships and has disclosure statements embedded in the solution. The results for payers are streamlined claims-processing workflows, reduced reimbursement errors and improved payment integrity.

OPTUM® Prospective Payment Systems The OPTUM® Prospective Payment Systems (PPS) software application, an integrated partner product, maps, groups and prices facility claims to ensure appropriate reimbursement. OPTUM®'s ECMPro™ application integrates with TriZetto®'s NetworX Suite® solution to manage grouping, pricing, editing and mapping for Federal (DRG, APC, ASC, IRF, SNF, CAH, LTCH, IPF, Physician) Prospective Payment Systems (PPS) and more than 20 state and payer specific PPS. Facility (inpatient and outpatient) and professional Medicare PPS, and a number of Medicaid PPS are integrated with NetworX Pricer® to support auto-adjudicated claims processing. Users can also apply the supported Medicare and/or Medicaid PPS to their commercial business processing. The integrated solutions streamline claims-processing workflows to reduce reimbursement errors and improve payment integrity. Avalon Healthcare Solutions Avalon Healthcare Solutions is the world's first and only Lab Insights company, bringing together our proven Lab Benefit Management solutions, lab science expertise, digitized lab values, and proprietary analytics to help healthcare insurers proactively inform appropriate care, reduce costs, and improve clinical outcomes. Working with health plans across the country, covering more than 15 million lives, Avalon is pioneering a new era of value-driven care with its Lab Insights System. The company delivers 7–12% outpatient lab benefit savings and captures, digitizes, and analyzes lab results in real time to provide actionable insights for earlier disease detection, ensure appropriate treatment protocols, and drive down overall cost. Through Avalon's partnership with Cognizant, TriZetto® Facets® clients can rapidly realize these savings by leveraging the real-time Facets Interface to Avalon. Zelis™ Healthcare Zelis™ Healthcare delivers measurable value through our unparalleled claim integrity solutions, operational excellence and healthcare intelligence. Our integrated multiple products and solutions ensure that our clients are obtaining the highest level of savings on each claim through our robust technology and precise processes, enhanced with human expertise. Through our partnership with Cognizant for a near real-time interface to TriZetto's® Facets™ core administration platform, we ensure that your daily claim process is kept intact, operation rule consistency automation is achieved, and most importantly, near real-time capabilities reduce turnaround time from days/ hours to seconds. With the Facets™ interface to Zelis Payment Integrity services, you will also see reduction of loss ratio and increased operational

transparency, all of which can lead to substantial savings. ECHO® ECHO® is an insurance technology company focused on removing the complexity and costs of healthcare payment processing. We manage every aspect of the payment process through a single HITRUST-certified platform fully integrated with TriZetto Facets: claim disbursement, provider EFT and ERA enrollment, compliance, reconciliation, reporting, and 1099 processing. With this simplified approach, we save our customers over $1 billion annually while issuing over 500 million transactions totaling over $100 billion in payments. ECHO maintains the largest network of healthcare provider payment and remittance delivery preferences and prides itself on providing the most electronic options to providers in a secure environment. The variety of our payment modalities promotes the most significant level of electronic adoption; and our fraud prevention tools comfort the over 330 payer customers and over 1 million providers in our network. Zelis™ Payments Zelis™ Payments is a leading healthcare payments technology company dedicated to delivering value via exceptional client experiences. Our solutions facilitate regulatory compliance and streamline the transfer of healthcare payments and data. Through our proprietary integration with Cognizant's TriZetto® Facets, Zelis Payment's technology becomes a part of your daily workflow to create a seamless payment process, which improves accuracy and reduces process complexity for significantly improved cost control. To ensure provider satisfaction and reduce noise, we employ a unique, provider-centric enrollment and support model, which encourages electronic adoption and network retention. ECHO® ECHO® is an insurance technology company focused on removing the complexity and costs of healthcare payment processing. We manage every aspect of the payment process through a single HITRUST-certified platform fully integrated with TriZetto Facets: claim disbursement, provider EFT and ERA enrollment, compliance, reconciliation, reporting, and 1099 processing. With this simplified approach, we save our customers over $1 billion annually while issuing over 500 million transactions totaling over $100 billion in payments. RedCard RedCard delivers reliable, client branded, enhanced design and production of critical customer communications including healthcare checks, explanation of payments (EOPs), explanation of benefits (EOBs), healthcare (ID) cards, enrollment-related correspondence, and letters delivered in the mail or via the Web. RedCard enables clients, through an integrated set of web-based self-service management tools, the ability to redesign its member and provider communication utilizing the latest four-color technology. Based on client-specific needs, it will also enhance communication time frames using its industry first, healthcare episode-based claim bundling option. This integrated system creates new cost savings while changing the frequency, look, and feel of the communications, allowing for fewer customer service calls and an overall better experience. Cúratus Cúratus delivers end-to-end provider data management (PDM) technology to government-sponsored and commercial health plans and provider groups through our ProviderLenz 'Platform as a Service' (PaaS) system. ProviderLenz is a full-service and AI-

enabled PDM solution empowering automated dissemination of curated provider data to all operational systems within a payer's IT infrastructure ensuring the most up-to-date provider information is available enterprise-wide. Payers leveraging ProviderLenz will reduce costs associated with managing provider data while improving operational efficiency, compliance, and customer service. The many Cognizant payer clients using the industry-leading TriZetto® Facets® core administration platform can now leverage bi-directional and automated data exchange by utilizing the TriZetto® Configuration Orchestrator for Facets® to Provider Service with the ProviderLenz PDM technology. This integrated solution will further streamline claims-processing workflows, consolidate IT tools managing interactions with network partners, and reduce the administrative burden on those same network partners. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Brooksource is a trusted IT and engineer resourcing, advisory and training services provider for Fortune 500 organizations and the public sector. Whether you are a single-state plan, multi-state Blue Cross Blue Shield plan or a large non-blue national payer, we're excited to discuss how our localized and on-shore services can elevate your IT and claims efforts. Our overall partnering model focuses on succession planning as well as project and product-based solutions. We offer customized experience-driven staffing, professional services, and/or upskilling and training solutions. Brooksource is a certified partner for TriZetto Consulting, Salesforce, AWS, Microsoft, Google Cloud and many other technology alliances. With a growing national presence, we are working to redefine what to expect from an IT and engineering services provider. If you're feeling over-leveraged by your existing partners, leading to a lack of true in-house knowledge investment, we can help. Starting with your Facets and claims-based skills, we provide upskilling and training with TriZetto® University that can be customized for your current environment, and for future product investments like TriZetto® QNXT® and TriZetto® Elements™. Brooksource highlights: Excell HCA stands as a leading healthcare consulting services firm, dedicated to guiding healthcare organizations towards excellence through innovative approaches, cost-effective solutions, and timely execution. Our comprehensive range of services encompasses strategy development, planning, solution design, rigorous testing, training, and ongoing operational support. We specialize in tailoring solutions to meet the specific needs of end-users, fostering adoption and driving value-based outcomes. With an open-minded mindset, our team addresses complex challenges and consistently delivers exceptional results for our payer and provider clientele. Dave Siegel Consulting was founded in 2014 with the goal of providing the highest-quality technology services to the healthcare payer industry, especially to the users of Cognizant TriZetto® Facets® product suite. Specializing in developing custom solutions that leverage the

Facets Open Access® toolset, Dave Siegel Consulting ultimately seeks to enable our clients to take advantage of the full power and flexibility of the Facets platform. If you are new to Facets, our 25 years of experience in architecting and developing Facets-based solutions will jump-start your development efforts. We will bring your architects and developers up to speed with the latest Facets integration tools, and design approaches to bridge the functional gaps that differentiate you from your competitors. If you are an established Facets shop, we'll support your ongoing development efforts and version upgrades, mentor new team members, and help optimize your existing codebase. Our clients range from regional plans and third-party administrators to multi-state Blue Cross / Blue Shield organizations. GeBBS Consulting provides award-winning staffing and consulting solutions to the healthcare ecosystem, including Health Plans, Hospitals, TPAs, Medical Centers, and leading healthcare software vendors. Our team of highly skilled professionals are dedicated to the healthcare industry providing expertise across the full range of provider and payer applications, as well as infrastructure, data, security, and other technical and business services. Our solutions for meeting our client's IT staffing needs extend from solving individual staffing gaps to providing entire project teams. Our deep expertise in systems, product roadmaps and business process re-engineering ensure that you can deliver the performance you require today while being ready for the latest digital enhancements, embrace new industry trends and address changing regulations. We consult, plan, implement, and manage hundreds of healthcare technology projects each year. InterScripts is a global healthcare technology firm that provides solutions, technology services and managed services to clients in both the payer and provider markets. Our consultants bring both operational business knowledge and extensive technical skills to every engagement, including deep experience with TriZetto products such as QNXT™, Facets®, CareAdvance and NetworX™. InterScripts' expert teams can assist with planning and assessments, implementation and upgrades, configuration and optimization, training management and support, along with service desk support, application support, asset management, cybersecurity, data management services, network infrastructure management and system administration. As a full stack development shop specializing in healthcare data management, InterScripts has extensive interoperability experience with major platforms like Epic or Cerner and hundreds of other niche EMRs, allowing us to create integrated partnerships with payers and providers. InterScripts' broad provider knowledge enhances our ability to set expectations and ask the necessary questions, ensuring successful collaborations. With offshore certified support facilities and blended shore models, InterScripts can help keep TriZetto support costs low while delivering high-quality services. InterScripts is proud of its reputation for putting clients first, being easy to work with, and delivering results. Additionally, our Healthcare Division proudly holds ISO 27001, HIPAA, SOC 2 Type 2, and CMMI Level 3 Certification, demonstrating sound security and privacy practices aligned with the core requirements of the healthcare industry. Let Mediant Health Resources bring synergy to your Cognizant® TriZetto® Healthcare Products initiatives. With more than four decades of experience focused solely in healthcare IT consulting, we have built lasting relationships with clients and consultants across the nation. We understand the challenges that payors and providers face and we have the top subject matter specialists

and project managers knowledgeable and experienced in the Cognizant® TriZetto® solutions, like TriZetto® Facets® and TriZetto® QNXT™, for your projects. Mediant's services include planning and assessment, implementation and upgrades, configuration and optimization, and training management and support. For many nationwide payors, we have successfully provided strategic consultation to ensure that their systems, processes, and personnel are operating at the highest efficiency in design, system architecture, and data quality currently and for the future. Rest assured when you partner with Mediant Health Resources we are committed to helping you achieve your project goals with the most qualified consultants and efficient processes keeping your projects on track and on budget. Let's begin building a relationship. Rhyno Healthcare Solutions is dedicated to the Transformation of Healthcare. Optimizing return on investment, end user experience and improved adoption, and return on outcomes in healthcare programs are our passion and single focus. We do this through strong partnerships with our customers and other vendors sharing the same vision. Decades of experience have shown both the best practices and avoidable pitfalls in any implementation, small or large, departmental or enterprise. "Rhyno's sole focus is your success . . . through partnership with your teams in every phase. Our staff puts your needs first." SourcEdge serves as a trusted technology solutions partner helping health plan CIOs and VPs modernize and maintain their claims systems. By working closely as a Cognizant-certified Consulting Partner, we help our clients achieve financial and operational returns. SourcEdge has in-depth expertise in TriZetto® Facets® and TriZetto® QNXT™. Our talented people bring the most modern tools and proven best practices to each project to help health plans serve their members/patients and providers every day. Our flexible engagement includes project delivery, consulting, and staff augmentation services. SourcEdge serves over 25 health plans across the US. Stellar Global Solutions is a creative technology company providing key digital services. Stellar Global Solutions is focused on helping our clients to build a successful business on web and mobile. Our empathetic approach keeps people at the center of everything we do, at every stage. We bring success to our clients with a culture rooted in creativity, respect, accountability, and inclusiveness. We dedicate ourselves to deliver high-quality solutions and services to all customers. Tegria is a healthcare consulting and services firm that provides strategic advisory, technology services and managed services to clients in both the payer and provider markets. Our Payer Services team delivers solutions to help regional health plans, provider-owned health plans, large national payers and government agencies adapt their business processes and successfully implement technology solutions to thrive in the changing healthcare landscape. Our consultants bring both operational business knowledge and extensive technical skill to every engagement, including deep experience with TriZetto products such as QNXT™, Facets®, CareAdvance and NetworX™. Tegria is proud of its reputation for putting clients first, being easy to work with and delivering results. In addition, Tegria's Payer Division holds a HITRUST CSF® Certification, demonstrating effective security and privacy practices aligned with the requirements of the healthcare industry. Proven value by delivering complementary software, services or technology that expand QNXT™.

Claims editing and auditing Claims grouping and pricing Cost management solutions Enterprise document management Healthcare account and funds management Healthcare payments technology Outbound printing and fulfillment Provider data management QNXT partners Become a partner Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : OPTUM® Claims Editing System The OPTUM Claims Editing System, an integrated partner product, is a powerful adjunct to the QNXT™ enterprise core administration system. The Claims Editing System is a transparent open-architecture and rules-based application that provides a commercial and Medicare-compliant Knowledge base of edits and utilizes date-sensitive processing to adjudicate both professional and facility claims. The application includes full customization capabilities for software auditing logic as well as data relationships and has disclosure statements embedded in the solution. The results for payers are streamlined claims-processing workflows, reduced reimbursement errors and improved payment integrity. Micro-Dyn Medical Systems, Inc. Micro-Dyn Medical Systems, Inc. offerings are integrated partner products. Micro-Dyn specializes in software products for healthcare claim DRG calculation, APC assignment, Medicare reimbursement calculation, data editing, and validation to Medicare specifications. Micro-Dyn's DRGActive™, APCActive™, and PRICERActive™ software and data editing components integrate seamlessly with QNXT to immediately add data validation, DRG/APC calculation and Medicare reimbursement capability. Change Healthcare Change Healthcare is a key catalyst of a value-based healthcare system—working alongside customers to accelerate the journey towards improved lives and healthier communities. Payment Integrity solutions from Change Healthcare are integrated with the TriZetto Healthcare Products QNXT™ enterprise core administration system. By leveraging the Change Healthcare Intelligent Healthcare Network™—the single largest financial and administrative network in the U.S. healthcare system—these solutions provide the broadest view of billing activity to help identify inappropriate claims before they are paid. Our extensive network enables a multi-payer data set with unparalleled insights, allowing payment accuracy solutions at every stage of the claim lifecycle: pre-submission, pre-payment and post-payment. We deliver an end-to-end suite of solutions and services that combat many of the ways that payers are at risk for paying inappropriate claims. Zelis™ Healthcare Zelis™ Healthcare delivers measurable value through our unparalleled claim integrity solutions,

operational excellence, and healthcare intelligence. Our integrated multiple products and solutions ensure that our clients are obtaining the highest level of savings on each claim through our robust technology and precise processes, enhanced with human expertise. Through our partnership with Cognizant for a near real-time interface to TriZetto's® QNXT™ core administration platform, we ensure that your daily claim process is kept intact, operation rule consistency automation is achieved, and most importantly, near real-time capabilities reduce turnaround time from days/hours to seconds. With the QNXT™ interface to Zelis Payment Integrity services, you will also see reduction of loss ratio and increased operational transparency, all of which can lead to substantial savings. OnBase® by Hyland OnBase® by Hyland, an enterprise content management (ECM) solution, integrates with TriZetto® QNXT™ to provide payers with a single point of access for clinical and administrative content. OnBase for TriZetto QNXT gives users access to related content from within QNXT's native view, meaning adjusters and plan administrators do not need to leave their QNXT window to search for information, speeding claims resolution and increasing member and provider satisfaction. WEX Inc. Cognizant and WEX Inc. have partnered to offer consumer-driven healthcare administration and benefits card solutions for payer organizations. Through the partnership, WEX Inc.'s industry-leading consumer-driven healthcare administration system, WEX Health Cloud, is available to Cognizant TriZetto® QNXT™ enterprise core administration system clients. The partnership agreement includes the WEX Health Payment Card which uses patented technology to achieve the highest auto-substantiation rates in the industry. WEX Inc. simplifies the business of healthcare through WEX Health Cloud, a cloud-based healthcare financial management platform that drives efficiency for benefit administration technology, consumer engagement, and advanced billing and payments. Our partner organizations enable us to deliver our industry-leading and award-winning solution to 225,000 employers and more than 24 million consumers. Together we take the complexity out of defined contribution, HSAs, HRAs, FSAs, VEBAs, PRAs, premium billing, public and private health insurance exchanges, COBRA, wellness plans, and transit plans. Learn more at www.wexinc.com, and follow WEX Inc. at @WEXIncNews. ECHO® ECHO® is an insurance technology company focused on removing the complexity and costs of healthcare payment processing. We manage every aspect of the payment process through a single HITRUST-certified platform fully integrated with TriZetto QNXT: claim disbursement, provider EFT and ERA enrollment, compliance, reconciliation, reporting, and 1099 processing. With this simplified approach, we save our customers over $1 billion annually while issuing over 500 million transactions totaling over $100 billion in payments. ECHO maintains the largest network of healthcare provider payment and remittance delivery preferences and prides itself on providing the most electronic options to providers in a secure environment. The variety of our payment modalities promotes the most significant level of electronic adoption; and our fraud prevention tools comfort the over 330 payer customers and over 1 million providers in our network. Zelis™ Payments Zelis™ Payments is a leading healthcare payments technology company dedicated to delivering value via exceptional client experiences. Our solutions facilitate regulatory compliance and streamline the transfer of healthcare payments and data. Through our proprietary integration with Cognizant's TriZetto® QNXT, Facets, or QicLink , Zelis Payment's

technology becomes a part of your daily workflow to create a seamless payment process, which improves accuracy and reduces process complexity for significantly improved cost control. To ensure provider satisfaction and reduce noise, we employ a unique, provider-centric enrollment and support model, which encourages electronic adoption and network retention. Change Healthcare Change Healthcare is an integrated partner with the QNXT™ enterprise core administration system, providing a single, automated communications and payments platform. The Change Healthcare QNXT interface provides a seamless connection for streamlined implementation; and enables better member engagement with printed and electronic communications across all lines of business, including Commercial, Individual, Medicare, Medicaid, PBM and Dental. Change Healthcare provides significant opportunities for QNXT customers to reduce overall costs, mitigate risk and drive digital adoption associated with regulated and non-regulated member communications and provider payments. Preference-based intelligent payment analytics drives the most cost-effective payment distribution platform. Change Healthcare is the industry's largest communications vendor dedicated 100% to healthcare, which provides economical and technology-enabled solutions with efficiencies at scale, including savings with participation in the Change Healthcare Health Payers USA cooperative, the nation's first and largest healthcare postage cooperative. QNXT customers also have better controls with access to a comprehensive web-based virtual mailroom, which provides configurable self-service document management, editing, composition, audit, tracking and reporting. ECHO® ECHO® is an insurance technology company focused on removing the complexity and costs of healthcare payment processing. We manage every aspect of the payment process through a single HITRUST-certified platform fully integrated with TriZetto QNXT: claim disbursement, provider EFT and ERA enrollment, compliance, reconciliation, reporting, and 1099 processing. With this simplified approach, we save our customers over $1 billion annually while issuing over 500 million transactions totaling over $100 billion in payments. ECHO maintains the largest network of healthcare provider payment and remittance delivery preferences and prides itself on providing the most electronic options to providers in a secure environment. The variety of our payment modalities promotes the most significant level of electronic adoption; and our fraud prevention tools comfort the over 330 payer customers and over 1 million providers in our network. RedCard RedCard delivers reliable, client branded, enhanced design and production of critical customer communications including healthcare checks, explanation of payments (EOPs), explanation of benefits (EOBs), healthcare (ID) cards, enrollment-related correspondence, and letters delivered in the mail or via the Web. RedCard enables clients, through an integrated set of web-based self-service management tools, the ability to redesign its member and provider communication utilizing the latest four-color technology. Based on client-specific needs, it will also enhance communication time frames using its industry first, healthcare episode-based claim bundling option. This integrated system creates new cost savings while changing the frequency, look, and feel of the communications, allowing for fewer customer service calls and an overall better experience. Cúratus Cúratus delivers end-to-end provider data management (PDM) technology to government-sponsored and commercial health plans and provider groups through our ProviderLenz

'Platform as a Service' (PaaS) system. ProviderLenz is a full-service and AI-enabled PDM solution empowering automated dissemination of curated provider data to all operational systems within a payer's IT infrastructure ensuring the most up-to-date provider information is available enterprise-wide. Payers leveraging ProviderLenz will reduce costs associated with managing provider data while improving operational efficiency, compliance, and customer service. The many Cognizant payer clients using the industry-leading TriZetto® QNXT™ core administration platform can now leverage bi-directional and automated data exchange by utilizing TriZetto® Configuration Orchestrator for QNXT™ to Provider Service with the ProviderLenz PDM technology. This integrated solution will further streamline claims-processing workflows, consolidate IT tools managing interactions with network partners, and reduce the administrative burden on those same network partners. If your organization offers solutions that could potentially enhance those offered within Cognizant's line of TriZetto Healthcare Products and provide added value or an enhanced experience for our payer clients, click here. TriZetto Digital Platform

----- Arcticle source ----- https://www.cognizant.com/us/en/trizetto/connected-health-solutions/trizetto-digital-platform ----- Let us manage the risk Products Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Technology solutions that allow our clients to focus on managing business, not IT The TriZetto® Digital Platform is an integration point for our products as well as those from partners, key to our clients' business. Bi-directional data access and integration capabilities deliver relevant, actionable information and insights to a health plan's members, providers, consumers and other authorized stakeholders. The platform runs secure software-as-a-service (SaaS) operations on a multi-tenant architecture that offers two significant benefits to our clients: Leveraging key capabilities of Microsoft Azure, we've built a system-agnostic platform, including a data orchestration layer that uses rich application programming interfaces to automatically communicate in real time with core administration systems and critical applications. The platform draws directly from source systems to provide data when and from where it's needed, ensuring a high degree of data integrity. It does this using a data lake to store data irrespective of its source and structure,

making it an efficient and cost-effective data storage option for event-driven data access needs while still supporting traditional batch processing. Expensive software upgrades and costly integration maintenance become a thing of the past with the TriZetto® Connected Health Solutions powered by the TriZetto Digital Platform. Enables physicians and other care providers to access detailed information on their patients, efficiently log claims and make templates for common claims, as well as easily create referrals and authorizations. Members may interact anytime, anywhere and receive a detailed view of their coverage information with compelling metrics, timely notifications and relevant healthcare content. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Benefitfocus Benefitfocus® solution utilizes healthcare data to manage plan risk and create actionable reporting analytics. Available exclusively to QicLink core application users, this solution populates standard, ad hoc and in-depth reporting tools with QicLink data, allowing the dissemination of monthly reports via single sign-on access to a secure website. Flexible reporting options and the ability to dig deep into a wide array of details provide the insights required to make informed, cost-effective health and wellness decisions. Change Healthcare Change Healthcare is an integrated partner product with the QicLink™ enterprise core administration system, providing advanced payment processing technology with a wide range of printed and electronic payment options available through a single platform. These solutions can reduce administrative costs by maximizing adoption of electronic payments, and reduce print and mail costs for print-related payments by consolidating printing and correspondence. Participation in the Change Healthcare HealthPayers USA Postage cooperative—the nation's first and largest healthcare postage co-op—offers significant postage and operational savings. Full-color printed or electronic EOBs, omni-channel communications, and monthly or episodic consolidation options help to reduce administrative costs and differentiate your consumer experience. Preference-based intelligent payment analytics can determine the most cost-effective payment distribution channel. Cigna Healthcare℠ Through our relationship with Cigna Healthcare SM, we offer access to The Cigna Healthcare National Medical and Dental PPO Networks1. Participation in this program provides access from a trusted brand to nearly 1.2 million2 healthcare providers, 6,200 hospitals2 and 130,586 dentists at more than 284,360 locations3. This means expanded network access for employer groups, as well as discounts that help drive increased plan savings, with the average in-network medical discount being 58.6%4. This robust and competitive healthcare professional/dental network offering is delivered via personalized administration services using the QicLink core administration system. Cigna Healthcare is an independent company and not affiliated with Cognizant. Access to the Cigna Healthcare PPO network and the Cigna Dental PPO Network is available through Cigna Healthcare's contractual relationship with Cognizant. All Cigna Healthcare products are provided exclusively by or through operating subsidiaries of Cigna Healthcare, including Cigna Health and Life Insurance Company. The Cigna

Healthcare name, logo and other marks are owned by Cigna Intellectual Property, Inc. 1The Cigna Healthcare PPO Network refers to the healthcare providers (doctors, hospitals, specialists) contracted as part of the Cigna Healthcare PPO for Shared Administration. 2Cigna Healthcare analysis of actual providers contracted as part of the Cigna Healthcare PPO Network for Shared Administration as of July 2023. Data is subject to change. 3Cigna Healthcare analysis as of 3/31/23. Data is subject to change. Contracted access point accounts for every provider at every contracted location; provider may practice at more than one location so may be counted more than once. 4Average discount based on actual Cigna HealthcareSM PPO Network paid claims for the period 1/1/22–12/31/22. Cigna Healthcare analysis conducted July 2023. Actual results may vary based on utilization, plan design, and geography. ECHO® ECHO® is an insurance technology company focused on removing the complexity and costs of healthcare payment processing. We manage every aspect of the payment process through a single HITRUST-certified platform fully integrated with TriZetto QicLink: claim disbursement, provider EFT and ERA enrollment, compliance, reconciliation, reporting, and 1099 processing. With this simplified approach, we save our customers over $1 billion annually while issuing over 500 million transactions totaling over $100 billion in Payments. ECHO maintains the largest network of healthcare provider payment and remittance delivery preferences and prides itself on providing the most electronic options to providers in a secure environment. The variety of our payment modalities promotes the most significant level of electronic adoption. At the same time, our fraud prevention tools comfort the over 330 payer customers and over 1 million providers in our network. QicLink clients can eliminate 100% of print and postage expenses while achieving industry-leading electronic settlement rates. Zelis® Payment Integrity The Zelis Payment Integrity Claims Editing solution uses leading-edge technology combined with expert insight to analyze claims and identify billing and coding accuracy by cross-referencing claims history and claims data. Their fast, accurate results are fully aligned with industry-recognized guidelines, ever-changing compliance requirements and a client's unique needs. All of this is completed before any payments are made. The Zelis Payment Integrity Claims Editing solution is tightly integrated with QicLink via the ClaimsExchange Post-Adjudication Processing functionality. Zelis™ Payments is integrated with QicLink to streamline the transfer of healthcare payments and data. Operational expenses are reduced because Zelis Payments manages the provider recruitment and enrollment process, while print costs and postage expenses are decreased through virtual credit card/ electronic payments. Administrators receive detailed reports of electronic payments issued, and have 24/7 access to information via a secure payer web portal. Zelis RedCard RedCard (Zelis Payments Optimization) offers QicLink integrated healthcare claims communication and ID card fulfillment services. This integration allows QicLink clients to quickly and easily produce claims payment, Explanation Of Benefits (EOB) and pended claims communications data output for transmission to RedCard for payment and communications fulfillment. Customer service representatives, members and providers are able to view images of checks/EOBs via the web browser-based QicLink Customer Service and QicLink Benefits Exchange solutions. Optimize operations and extend application functionality Comprehensive functionality to support specialty lines of business Effective tools that

support today's complex provider network and care management initiatives Manage the cost and quality of care with access to affordable, QicLink-integrated solutions Connect to a vast network of PPOs for electronic claims routing and re-pricing Services that offer meaningful business outcomes. Benefit from our unparalleled healthcare business consulting expertise. Put next-generation technologies in place that build a stronger, more agile business and lay the groundwork for future AI and automation initiatives. Get services that ease the strain of managing your infrastructure so you can focus on managing your business. Take advantage of our unrivaled resources and healthcare expertise to meet your IT business needs. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : QicLink AutoDental™ incorporates user-defined dental processing edits to drive increased claim auto-adjudication. When used in conjunction with QicLink ClaimWorkflow, AutoDental can accept claims electronically. The application integrates with dental usual and customary tables and stores member/enrollee dental histories. Tooth charts automatically update with each claim. QicLink™ Dental Logic allows administrators to develop a series of

customer-specific dental claims processing rules that help confirm claim appropriateness prior to payment. QicLink utilizes these rules to determine how to electronically process dental claims based upon the criteria established for a specific plan, revision level, procedure, tooth, surface and age. The Dental Logic rule data ensures that the oral care service provided meets customer plan requirements as well as standard dental practice policy, based on procedure code and prior claim history. QicLink Consumer-Directed Healthcare (CDH) Suite helps TPAs cost-effectively administer high-deductible health plans, health savings accounts and health reimbursement arrangements. The suite of applications automates the combined administration of HRAs/FSAs/HSAs; improves workflows; enables online enrollment and access; and facilitates seamless interoperability across the enterprise. QicLink Benefits Exchange™ (QBE) lets administrators offer a comprehensive integrated online solution to their client managers and enrollees. With QBE, system users can automate routing of benefits inquiries and provide enrollees, physicians, hospitals, PPOs, employers, and plan sponsors with secure online access to eligibility data and claims status information. QicLink™ Disability Benefits manages both short- and long-term disability benefits processes—from specifying a disability benefit plan to year-end W-2 information processing. The software stores information for each employer group by effective dates, check group, carrier, policy number, fund account number and minimum fund balance. Each employer group can be maintained using Federal, Medicare, Social Security, State and two user-defined withhold tax tables. Both short- and long-term benefits can be linked for processing—with payments generated automatically based on the duration and frequency defined by the user. QicLink Flexible Spending™ is a comprehensive record keeping system that maintains enrollee contributions and expense and payment information and tracks year-to-date activity. The application allows for multiple user-defined account types (healthcare, dependent care, pre-tax premiums, etc.) and applies edits when contributions, expenses and payments are entered. Optimize operations and extend application functionality Comprehensive functionality to support specialty lines of business Effective tools that support today's complex provider network and care management initiatives Manage the cost and quality of care with access to affordable, QicLink-integrated solutions Connect to a vast network of PPOs for electronic claims routing and re-pricing SOLUTION SUMMARY Support auto-adjudication for dental plans SOLUTION SUMMARY User-defined rules for dental processing DATA SHEET The TriZetto® QicLink™ Disability component is a comprehensive solution that is fully integrated with the QicLink™ system to manage your short-term and long-term disability benefits processes. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : QicLink Premium Billing™ allows TPAs to tailor billing, receivables, aging, lapse and cash posting control processes to meet their needs and supports automatic premium invoicing and payment via EFT. The application provides multi-level agent commission calculation options and automatically calculates and adjusts invoices due to late notification of enrollment; updates carrier and agent files when invoices are paid; and provides complete 1099 tracking for vendor and agent commission processing. QicLink ClaimWorkflow™ helps improve business processes via functionality that includes multi-source data acceptance (via clearinghouses and direct provider submission), automated rules-based routing of claims and encounters, and claims adjudication-based on pre-assigned routing conditions. QicLink ClaimRules™ enables rules-based, procedure-driven claims/encounter adjudication by incorporating efficient plan building and maintenance procedures using a pre-built claim logic matrix. The result is greater claims payment accuracy, increased auto-adjudication and significant cost savings. QicLink Customer Service™ provides ready access to multiple levels of information using point and click functionality, drop-down boxes, scroll lists and multiple sort and display options. Service call detail is captured and unresolved queries can be referred to another individual or department while management monitors and tracks call volumes and performance levels. QicLink dataPiction™ allows today's powerful relational database reporting and query tools to access QicLink application data. The system supports report distribution and offers an Open Database Connectivity (ODBC)—compliant

report writing tool for web-based publishing and ad hoc reporting. QicLink Claims Overflow Services offer an efficient, cost-effective alternative to accommodate those instances where a TPA's in-house team is temporarily overburdened with outstanding claims and is facing an overflow situation. Cognizant adjusters receive random audits for accuracy and consistency, while the organization's ready access to extensive on-site QicLink expertise further ensures high performance standards and reliability. QicLink Application Management Services deliver high-quality hosting services that enable TPAs to focus on client-facing core competencies, while IT infrastructure and application management functions are expertly maintained. Key Business Indicators provide information to assess the quality of services delivered, and specific Service Level Agreements (SLAs) guarantee system availability and performance levels Optimize operations and extend application functionality Comprehensive functionality to support specialty lines of business Effective tools that support today's complex provider network and care management initiatives Manage the cost and quality of care with access to affordable, QicLink-integrated solutions Connect to a vast network of PPOs for electronic claims routing and re-pricing SOLUTION SUMMARY SOLUTION SUMMARY SOLUTION SUMMARY SOLUTION SUMMARY SOLUTION SUMMARY SOLUTION SUMMARY SOLUTION SUMMARY Services that offer meaningful business outcomes. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Cognizant® Robotic Automation Services is a fully managed digital workforce that gives enterprises flexibility in automating high-volume or redundant tasks and enabling consistent outcomes in a fraction of the time. RPA mimics a human's path to completing a rules-based, repetitive task but requires significant, ongoing maintenance and support. If your system changes or upgrades, your robots must be rebuilt. RPA-as-a-Service delivers automation expertise, so your organization does not have to hire expensive in-house specialists. Cognizant builds, tests, operates and maintains robots configured to your organization's unique processes and objectives. With an RPA-as-a-Service model, clients can quickly increase the impact of automation on their bottom lines by completing transactions with more accuracy and efficiency at a lower cost and risk than building and maintaining RPA in house. See how Community Health Choice leveraged Cognizant Robotic Automation Services to increase efficiency in meeting Medicaid requirements and cut costs by 69%. Learn how PacificSource employed Cognizant Robotic Automation Services robots to improve quality of care and meet rigorous compliance requirements. Cognizant® Robotic Automation Services provides a digital workforce that gives clients flexibility in automating high-volume or redundant tasks, enabling consistent outcomes in a fraction of the time. Automate and simplify operational tasks

----- Arcticle source ----- https://www.cognizant.com/us/en/trizetto/optimization-software-products ----- Claim Test Pro Third-Party Interfaces CareAdvance Connect Configuration Data Analyzer EDI Transaction Generator Synthetic Executable Enterprise Data Advanced Batch Framework Test Data Generator Testing Automation Suite Products Lines of business Related services Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Accelerate and improve the process of testing and deploying new core system configurations. Greater efficiency raises the productivity of existing staff by reducing manual work and alleviating staffing pressure. Fundamentally redesigned configuration, testing and production processes accelerate responsiveness and time to market. Our solutions reduce the PHI risk inherent in duplicating production data and enable compliant security policies to ensure appropriate data use. With Claim Test Pro, you can test claims data efficiently and cost effectively and verify with confidence that correct claim totals are being paid. The solution greatly reduces the need to create test cases manually, automates the management and reconciliation of results, tracks and documents test projects and cases, and electronically converts system data to applicable testing data sets to create a robust and applicable testing environment. In addition, Claim Test Pro provides a comprehensive set of testing suites that support more diverse testing schemas and enables testing of a multitude of provider reimbursement scenarios. The solution automates many processes that were previously done manually, helping plans increase administrative efficiencies by reducing the resources needed to manage these initiatives. An added benefit of Claim Test Pro is that it provides management tools that track and report progress. Plans that do not have a strategy for testing and validating claims data may be at risk. Claim Test Pro can help you: We offer interfaces with third-party solutions from ECHO, Zelis and Lyric Secondary Editing that enable quick and seamless data and batch exchanges between these solutions and our Facets® and QNXT™ core administrative systems.

CareAdvance Connect allows care managers to download patient data from their case list in Clinical CareAdvance and conduct offline patient assessments in patient homes. When they regain Internet connectivity, care managers can upload the completed assessments to Clinical CareAdvance with the touch of a button. This seamless data exchange between CareAdvance Connect and Clinical CareAdvance delivers your organization benefits such as: Testing teams need a way to quickly analyze if data can be leveraged for test cases and understand coverage gaps. Configuration Data Analyzer analyzes a specific subset of configuration data. This optimization product provides use cases and relevant data models that can be converted into members, providers and claims that are useful for targeted testing. It also delivers relevant statistical models to evaluate risk against volume of testing. EDI Transaction Generator is a web application that provides a faster, smarter and more effective solution to automate EDI test data creation for healthcare transactions. This solution reduces time-consuming EDI data generation efforts by up to $70-80\%$ and produces compliant 834, 837 and other file formats. Synthetic Executable Enterprise Data is a healthcare test data management tool that provides PHI-free synthetic member and claim data for testing purposes. This synthetic data covers a wider range of real-world scenarios, business processes and conditions to enable more accurate testing and wider coverage. Advanced Batch Framework allows clients to quickly build and standardize batch processes and gain more control over batch operations. This flexible solution supports Facets batches in either a traditional data center or in cloud-based infrastructures. With Advanced Batch Framework, you can: Before adding new functions, changing system configurations or design, it is important to test them in a way that keeps health information fully protected. Test Data Generator creates non-production data sets of both transactional and configuration data, allowing healthcare organizations to test possible changes before implementing them. The tool ensures that protected health information (PHI) remains fully secure by stripping the data of personal identifying information and creating key word files with all new identity information. The result is size-controlled data sets of randomized non-production data. Using Test Data Generator, healthcare organizations can: TriZetto® Testing Automation Suite is a licensed software solution that automates the validation and testing of health plan software product implementations. It can be used to automate data-driven testing such as benefit configuration data, batch processes, API integrations, upgrade and regression testing scenarios and EDI-type transaction processing. Testing Automation Suite can reduce cost and alleviate staffing pressure by automating much of the test execution process. The tools needed to fine-tune the Facets environment. The tools needed to fine-tune the QNXT environment. Our comprehensive, flexible and scalable core administrative solutions enable the digital transformation required for success in the commercial market. Support for the economic advantages and efficiencies. Get flexible IT solutions to address your unique business requirements with customizable functionality.   Build functionality that adapts to meet the complexities and demands of the Medicare Advantage market. Build capabilities that adapt to meet the complexities and demands of the Managed Medicaid market. Apply flexible solutions that streamline the coordination of multiple compliance requirements and ease administration burdens. Services that offer meaningful business outcomes. Benefit from our

unparalleled healthcare business consulting expertise. Put next-generation technologies in place that build a stronger, more agile business and lay the groundwork for future AI and automation initiatives. Get services that ease the strain of managing your infrastructure so you can focus on managing your business. Take advantage of our unrivaled resources and healthcare expertise to meet your IT business needs. Apply our proven software, technology, expertise and tested methodologies to manage your business more effectively. Our integrated software and services healthcare BPaaS solution includes process optimization, digitization and large-scale efficiencies. The tools needed to fine-tune the Facets environment.

----- Arcticle source ----- https://www.cognizant.com/us/en/trizetto/optimization-software-products/facets ----- Advanced Batch Framework CareAdvance Connect Claim Test Pro Configuration Data Analyzer Configuration Migration Utility for Facets® Configuration Orchestrator EDI Transaction Generator Facets® Enrollment Toolkit Facets® Security Manager Keyword Loader Supplemental Mapping Management for Facets® Synthetic Executable Enterprise Data Test Data Generator Testing Automation Suite Third-Party Interfaces Related services Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Advanced Batch Framework allows clients to quickly build and standardize batch processes and gain more control over batch operations. The flexible solution can support Facets batches in either a traditional data center or cloud-based infrastructures. With Advanced Batch Framework, you can: CareAdvance Connect allows care managers to download patient data from their case list in Clinical CareAdvance and conduct offline patient assessments in patient homes. When they have secure Internet connectivity, care managers can upload the completed assessments to Clinical CareAdvance with a touch of a button. This seamless data exchange between CareAdvance Connect and Clinical CareAdvance delivers your organization such benefits as: With Claim Test

Pro, you can test claims data efficiently and cost effectively and verify with confidence that correct claim totals are being paid. The solution greatly reduces the need for manual creation of test cases, automates the management and reconciliation of results, tracks and documents test projects and cases and electronically converts system data to applicable testing data sets to create a robust and applicable testing environment. In addition, Claim Test Pro provides a comprehensive set of testing suites that provide for more diverse testing schemas, enabling testing of a multitude of provider reimbursement scenarios. The solution automates many processes that previously were done manually, helping plans increase administrative efficiencies by reducing the resources needed to manage these initiatives. An added benefit of Claim Test Pro is that it provides management tools that track and report progress. Plans that do not have a strategy for testing and validating claims data may be at risk. Claim Test Pro can help you: Testing teams need a way to quickly analyze if data can be leveraged for test cases and understand coverage gaps. Configuration Data Analyzer analyzes a specific subset of configuration data. This optimization product provides use cases and relevant data models that can be converted into members, providers and claims that are useful for targeted testing. It also delivers relevant statistical models to evaluate risk against volume of testing. When making and managing system configuration changes, it is critical that payers continually test in order to validate the integrity of the changes and to ensure that new configuration items are production-ready. This task becomes more complex when multiple, simultaneous changes are involved. The Configuration Migration Utility for Facets helps control, manage and successfully execute configuration promotions. It gives non-healthcare IT personnel the ability to migrate specific aspects of configuration changes from environment to environment in a manner that is controlled, workflow-integrated and audit-capable. With this tool, you can: TriZetto® Configuration Orchestrator automates the input and configuration of benefit plans and provider networks into health plan core administrative systems, saving clients significant staff time and cost and reducing the possibility of error that manual configuration entails. EDI Transactions generator is a web application that provides a faster, smarter, and more effective solution to automate EDI test data creation for healthcare transactions. This solution reduces time-consuming EDI data generation effort by up to 70–80% and produces compliant 834, 837, and other file formats. Facets Enrollment Toolkit is a set of integrated tools and adapters that streamlines the auto-enrollment process. The toolkit increases the auto-enrollment success rate by intelligently managing the data receipt and correction process for enrollment records. The toolkit's built-in intelligence also makes it ideal for handling challenges like extremely high volume and inconsistent formatting. These features ensure that data is correct and validated before it is submitted to Facets and the records are consistent in form and content. With Facets Enrollment Toolkit, payer organizations can be confident that: Without an intelligent, automated process for designing, configuring, validating, testing and auditing access provisioning, healthcare organizations may run the risk of violating regulatory requirements. TriZetto Facets Security Manager provides a single, centralized repository for Facets security configuration data, automating the management of Facets security data across multiple Facets environments. The tool provides a controlled, managed process for keeping configuration data in sync among

environments such as training, development and production. Facets Security Manager can help: Keyword loader is a Facets® optimization tool that enables quick and accurate data migrations, loads, and updates. This solution can reduce or eliminate your error-prone manual and ad-hoc uploads by up to 95% through: Configure and manage claims processing rules and qualifiers. It can be quite complicated to manage and map complex claims processing rules and qualifiers used by various benefits plans. Supplemental Mapping Management for Facets solves these problems, managing interdependencies within the supplemental mapping and automating the researching, editing and auditing process for configuration data. It also provides much-needed transparency of the current configuration, dependencies and hierarchies while streamlining configuration management tasks. This solution helps healthcare organizations: Synthetic Executable Enterprise Data is a healthcare test data management tool that provides PHI-free synthetic member and claim data for testing purposes. This synthetic data covers a wider range of real-world scenarios, business processes, and conditions to enable more accurate testing and wider coverage. Before adding new functions, changing system configurations or design, it is important to test all changes in a way that keeps health information fully protected. Test Data Generator creates non-production data sets of both transactional and configuration data, allowing healthcare organizations to test possible changes before implementing them. The tool ensures that protected health information (PHI) remains fully secure by stripping the data of personal identifying information and creating key word files with all new identity information. The result is size-controlled data sets of randomized non-production data. Using Test Data Generator for Facets, healthcare organizations can: TriZetto® Testing Automation Suite is a licensed software solution that automates the validation and testing of health plan software product implementations. It can be used to automate data-driven testing such as benefit configuration data, batch processes, API integrations, upgrade and regression testing scenarios and EDI-type transaction processing. Testing Automation Suite can reduce cost and alleviate staffing pressure by automating much of the test execution process. We offer interfaces with third-party solutions from ECHO, Zelis, and Lyric Secondary Editing that enable quick and seamless data and batch exchanges between these solutions and our Facets® core administrative system. Services that offer meaningful business outcomes. Benefit from our unparalleled healthcare business consulting expertise. Put next-generation technologies in place that build a stronger, more agile business and lay the groundwork for future AI and automation initiatives. demand data access. Our comprehensive interoperability expertise, advisory services and software-as-a-service (SaaS) products help ensure your organization's interoperability solution addresses your unique needs while you meet compliance deadlines. TriZetto® Interoperability Data Hub Connect disparate data sources with this powerful orchestration tool that provides clinical and administrative data aggregation, cleansing, mastering, normalization and integration for delivery through interoperability APIs. TriZetto® Interoperability Privacy and Consent Engine Manage the new complexities of privacy and consent management and enforcement with confidence with our configurable engine that supports regulations and data request scenarios. TriZetto® Interoperability API Gateway Help ensure your members' data requests are met quickly and securely with this gateway that includes application programming interfaces (API) management, data access APIs, developer support and authentication capabilities. HL7® and FHIR® are the registered trademarks of Health Level Seven International and the use does not constitute endorsement by HL7. Give your members the power to control their health data and access it on demand through the app of their choosing. We provide all the required tools and capabilities, including APIs, an API gateway and API management, that enable your organization to support secure data access by third party applications. Our solution also enables you to support third-party developers with a portal that encompasses developer registration, access to an API library and an API sandbox. Increased data sharing through interoperability will create new opportunities for you to differentiate your business. We will help you identify business priorities and develop new strategies to mitigate the impact of interoperability on network design and benefits. We also help you create efficiencies and generate value in "Day 2" activities such as obtaining consent, primary care physician assignment, program enrollment, utilization and care management continuity. We help ensure your interoperability strategy remains aligned with the complex technical requirements of the interoperability rule. We track all proposed and amended regulations and scenarios that could affect your organization, integrating updates into our products as needed. Our SaaS products easily scale to deliver the features your business strategy requires. Deploy the entire suite or select components to meet your needs. Predictable costs streamline budgeting, forecasting and operations management. IDC recognizes Cognizant's strategic approach and investment, core experience, comprehensive solutions and SaaS delivery when naming us a vendor to watch in enabling customer-360 data platform for healthcare payers. SOLUTION OVERVIEW Meet compliance deadlines and achieve unique business. DATA SHEET Authorizing interoperability data sharing on-demand. DATA SHEET On-demand data access to assist interoperability compliance. DATA SHEET Supporting interoperability compliance with real-time orchestration. BLOG All that's missing from a high-tech approach to quelling a future outbreak is the ability to share personal and portable health records. BLOG To fight the spread of COVID-19, U.S. healthcare organizations need to share health data while meeting federal data interoperability requirements. PERSPECTIVES The new healthcare interoperability rule creates opportunities for payers to reinvent member experiences and create new value propositions. PERSPECTIVES Proposed interoperability rules will create opportunities for payers to create new services built on meeting compliance requirements. PERSPECTIVES Sweeping proposals could create true data

interoperability, opening the way to more efficient processes, enhanced quality of care—and new business models and competition. Maximize your government business potential

TriZetto® Enrollment Administration Manager and TriZetto® Enrollment Administration Manager Workflow Financial Reconciliation Manager TriZetto® Encounter Data Manager™ and TriZetto® Encounter Data Manager Workflow TriZetto® Risk Score Manager Power-up your government line of business Elements product suite Related thinking Featured work Lines of business Related services Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : From enrollment through encounter submissions, augment your core administration system with features to automate processing. TriZetto® Enrollment Administration Manager (EAM), powered by TriZetto® Enrollment Administration Manager Workflow, helps health plans move from enrollment to acceptance. EAM streamlines the process to enroll your members in Medicare Advantage. The product is constantly updated to reflect CMS regulatory changes and can pass data to both the Facets® and QNXT™ platforms, making it a critical part of a complete solution. The workflow manages the overall enrollment process, improving visibility and tracking throughout the enrollment lifecycle. TriZetto Enrollment Administration Manager and TriZetto Enrollment Administration Manager Workflow enable you to: TriZetto® Financial Reconciliation Manager (FRM) streamlines and automates the process of reconciling the amount plans have been paid by CMS with the member payments received, comparing plan and CMS membership data to flag and determine the impact of discrepancies. The system prioritizes inconsistencies with the greatest financial impact and provides key data to resolve discrepancies quickly. With Financial Reconciliation Manager you can: TriZetto® Encounter Data Manager™ (EDM) and TriZetto Encounter Data Manager Workflow supports submission requirements and provides functionality to help our clients meet applicable compliance expectations, improve revenue and reduce overhead. EDM provides a configurable and scalable encounter management solution that produces agency compliant encounter transactions, while enforcing submission rules to help prevent non-compliant transactions from being submitted to CMS, Commercial Exchange or state agencies. TriZetto Encounter Data Manager Workflow provides automation capabilities, improved visibility and efficiency to the encounter error correction process in order to enhance the completeness, accuracy and timeliness of the encounter submission. TriZetto® Risk Score Manager (RSM) analyzes data submitted by Claims Data Manager and Encounter Data Manager to calculate the risk scores your health plan can expect to be reimbursed based on the diagnoses submitted to CMS. It reconciles scores against monthly CMS data from the RAPS response files. With RSM, your health plan gains visibility into risk scores, which allows you to better forecast payments from CMS. RSM reconciles EDPS submissions to ensure the data submitted to CMS is accurate for both. With Risk Score Manager you can: INFOGRAPHIC

Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : With Cognizant® healthcare BPaaS, payers can rapidly modernize the processes necessary to support new healthcare delivery models. BPaaS for medicare and medicaid The Cognizant Healthcare Business Process-as-a-Service (BPaaS) solution allows payers to focus on core business opportunities and free up capital to invest in innovation. Our integrated software and services solution combines automation, expert insight and best-in-class industry processes and platforms in an outcome-driven, integrated service delivery model. Cognizant's outcome-driven BPaaS delivery model supports payers in the medicare advantage, managed medicaid, medicare part D, duals, PDP, medicare dupplement, commercial, individual and small group markets with core transaction processing for: Core IT modernization is achieved with

access to the industry's leading payer platform and ecosystem, which provides payers with a platform strategy rather than a product strategy. The high cost and stress of system changes and upgrades are eliminated by including maintenance and new releases within the Per Member, Per Month (PMPM) fee structure. With the Cognizant healthcare BPaaS solution, payers will always have current technology with built-in scalability. A top notch compliance program can do more than just help you avoid trouble; a properly administered compliance program can increase plan revenue by boosting star ratings, HEDIS scores and other measures of success, drive new business models and contribute to membership growth. Cognizant's healthcare BPaaS team includes an independent compliance and audit services department, governed by a compliance committee and chief compliance officer, dedicated to keeping you in front of regulatory and operational requirements. Services include: CASE STUDY Our core administration solution boosts revenue streams and reduces the total cost of ownership (TCO) by 25%. QUICK REFERENCE GUIDE In this reference guide, we examine enterprise challenges that necessitate the need for BPaaS adoption and the benefits of BPaaS in healthcare. REPORT Everest Group® report discusses how a platform-led BPaaS solution streamlines processes, increases scalability and drives operational excellence, providing next-generation core technology and domain expertise in an economical per member per month payment model. Embrace your digital future

----- Arcticle source ----- https://www.cognizant.com/us/en/trizetto/next-gen-technologies ----- Social media Mobile enablement Cloud Intelligent process automation Analytics Exceed expectations with compelling digital experiences Products Related services Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Contact us Thank you for your interest in Cognizant. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Consumer expectations have changed. Go beyond the expected by digitally transforming your healthcare business. Social media is an excellent tool to improve member engagement, reinforce brand identity and enhance patient satisfaction. Consumers today expect health plans to provide social media access on multiple popular channels. Consumers today rely on mobile devices for everything from communication and purchases through information access. That means health plans must provide mobile-enabled sites, apps and member portals to meet these expectations. Success in today's complex healthcare market requires agility, reliability and cost containment. That is why so many health plans are turning to the cloud for all or part of their application development, hosting and analytics. With on-demand clouds, healthcare organizations can run proof-of-concept projects without disrupting business operations. And by hosting TriZetto Healthcare Products in the cloud, payers can achieve greater efficiency, scalability and automation, along with lower costs. Automating previously manual processes is the key to greater efficiency. Add to that intelligent automation that grows smarter over time via machine learning, and healthcare organizations can expect even greater efficiencies and faster process times. Health plans are ingesting more and varied types of data than ever before—valuable data that can be mined and analyzed to help improve both patient outcomes and economic viability. With the right predictive analytics tools, health plans can make faster, better decisions to improve their administrative efficiencies, lower the cost of care and improve the member experience. Increases payer efficiency, improve productivity, reduce costs

and position your business for growth. Offers end-to-end solution that pairs modular SaaS products with industry-leading strategic consulting to connect disparate systems, standardize data and enable secure, authenticated access in real-time. Automates pricing scenarios to provide the best value to payers, providers and patients. Enables payer/provider collaboration to reduce costs and drive overall quality improvement. Members may interact anytime, anywhere and receive a detailed view of their coverage information with compelling metrics, timely notifications and relevant healthcare content. This integrated software and services healthcare BPaaS solution includes process optimization, digitization and large-scale efficiencies. Enables physicians and other care providers to access detailed information on their patients, efficiently log claims and make templates for common claims, as well as easily create referrals and authorizations. Manages EDI trading partners with one cost-effective, cloud-enabled technology service. Connects care managers to members and providers while reducing costs, personalizing interventions and improving care quality. Automate and simplify operational tasks associated with our core healthcare technology solutions, Facets and QNXT. Extend the functionality of your core system by providing critical capabilities from enrollment through risk adjustment, to efficiently administer government solutions. Automates transaction processing and information exchange between payer organizations and their external constituents. Services that offer meaningful business outcomes. Benefit from our unparalleled healthcare business consulting expertise. Put next-generation technologies in place that build a stronger, more agile business and lay the groundwork for future AI and automation initiatives. Get services that ease the strain of managing your infrastructure so you can focus on managing your business. Take advantage of our unrivaled resources and healthcare expertise to meet your IT business needs. Apply our proven software, technology, expertise and tested methodologies to manage your business more effectively. addition to hosting and managing your infrastructure, we can ensure that
your healthcare applications like Facets™ and QNXT™ are always optimized
and running smoothly. Our application management services include 24/7
management and service desk monitoring. Making sure your infrastructure
is running smoothly is critical. We offer managed data center and mainframe
operations; server, storage, database and middleware management;
managed data center hosting and utility models; cloud and converged
infrastructure solutions, data center consolidation, migration, software-
defined data center (SDDC), storage tiering and rationalization. Productivity
is key in today's cost-conscious environment. We offer managed workplace
services, service desk and field support services, messaging and
collaboration services. Additionally, we offer next-generation workplace
services, enterprise mobility and Bring Your Own Devise (BYOD) services,
and AppStore services. Customers and partners count on 100 percent
reliability, and that means continuous connectivity. We offer managed 24/7
network operations; remote access and secure access management;
managed VPN; campus, wireless and DC LAN; cloud-based network
transformation; optimized telecom vendor sourcing and operations; and
unified communication solutions. Moving some or all operations to the cloud
is the best way to improve efficiency, reliability, cost-effectiveness and
scalability. We offer optimized cloud operations with Cloud360; managed
Infrastructure as a Service (IaaS) and Platform as a Service (PaaS)
operations of hybrid cloud; cloud-based disaster recovery services, cloud
strategy with CloudSteps, private cloud infrastructure solutions; and
migration to a variety of cloud models. Increases payer efficiency, improves

Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : Professional services offer the best of both worlds: Smooth operations today and a path toward a more digital future. Change can be difficult and disruptive, but it is inevitable. The key is ensuring that your processes remain stable during system or regulatory changes. Our business readiness methodology uses a proactive approach to prepare you to weather these inevitable fluctuations.

Our governance structure guides better decision-making, while our methodology helps identify and mitigate risks associated with changes. The result is you clearly understand how changes will impact the way you run your business, and you can effectively manage the human elements of change. Healthcare organizations today need to be able to change system configurations quickly to adapt to everything from upgrades and benefit changes to new business lines, acquisitions and regulatory shifts. Our configuration methodology includes: Migrating data from one environment to another is inevitable, but the downtime, workflow and integration issues that often go along with it do not have to be a foregone conclusion. Whether you are migrating to new systems, assimilating acquired systems or launching systems to support a new business line, our comprehensive data migration services mean you will not have to worry about interrupting business operations or reducing performance. Our multidisciplinary team's deep systems and data knowledge, along with reliable toolkits and accelerators, ensure fast, cost-effective results. Whether it is integrating systems from new lines of business with existing internal applications or incorporating systems from recent mergers and acquisitions, systems integration is a necessary fact of life. Instead of focusing your team's resources on systems integration, consider using our services. We have the resources to quickly integrate your systems, along with deep expertise in virtually all major healthcare industry solutions. That deep knowledge means we can customize software with your business rules and processes. And with our pre-built toolkits, development accelerators and frameworks, we can integrate your systems quickly and smoothly. Increases payer efficiency, improves productivity, reduces costs and positions your business for growth. Offers end-to-end solution that pairs modular SaaS products with industry-leading strategic consulting to connect disparate systems, standardize data and enable secure, authenticated access in real-time. We are sorry. Unable to submit your request. Type in a topic service or offering and then hit Enter to search Type in a topic service or offering and then hit Enter to search Common Searches : We have the solutions you need to extend the functionality of your core system, fully integrated and immediately effective. Meeting the complex data processing and compliance requirements of Medicare Advantage, managed Medicaid and Commercial Exchanges in a timely manner is critical to your success. Our TriZetto Elements® suite extends the functionality of your core system with the features you need. By providing critical capabilities for tasks ranging from enrollment through encounter submissions, Elements helps you efficiently drive these lines of business forward. Our standalone solutions, including Facets®, QNXT™ and other core systems, integrate well together. The Elements products make it easy to share information and speed processing. With Elements you can: BEQ: The Batch Eligibility Query file includes transactions submitted by plans requesting eligibility information for prospective plan enrollees. Plans use BEQ files to conduct initial eligibility checks against the Centers for Medicare and Medicaid Services (CMS) Medicare Advantage Prescription Drug (MARx) database system to verify members Part A/B eligibility. TRR: The Transaction Reply Report is a daily electronic CMS file that includes member information and updates. The files also include Transaction Reply Codes (TRCs) to explain the system's actions in response to new information from CMS or input from managed care organizations (MCOs), CMS or other

vendors. OEC: Online Enrollment Centers submit Medicare membership information electronically. An Enrollment Administration Manager accepts these electronic enrollment files and automatically updates the membership. LEP: Late Enrollment Penalty information is included in the daily CMS TRR files. Correct LEP information is attached to the member's record and incorporated in the member's premium billing statement. MMR: The Monthly Membership Report is the electronic payment file from CMS. It is loaded automatically to help plans easily identify payment discrepancies and prioritize research for resolution. HCC: CMS uses a Hierarchical Condition Categories model to adjust capitation payments to health plans for the health expenditure risk of their enrollees. The CMS Risk Adjustment Model measures the disease burden using diagnosis codes associated with more than 70 HCC categories. The CMS model is cumulative, meaning that over time patients can have more than one HCC category assigned to them. Some categories override others within the category hierarchy. HCC MOR: The HCC Model Output Report file contains a series of flags indicating which demographic factors (age, sex and entitlements for Medicaid and disability) and disease factors (HCCs and disease interactions) are used to calculate the risk score for each beneficiary enrolled in the plan. Plans receive separate MOR files for Part C (CMS-HCC) and Part D (RxHCC) risk adjustment models. TriZetto's Enrollment Administration Manager offers efficient processing of all MA-PD CMS transactions from enrollment to acceptance by CMS through a modern user interface. Automated member eligibility verification directly with CMS (BEQ) Accepts electronic enrollments, auto-enrollments and CMS OEC TRR Rules Engine provides configurable rule-based processing of the daily TRR file plans received from CMS Out of area verification process Triggers Medicare correspondence and provides standard reports, including CMS compliance reports Workflow tool automates the routing and assignment of work items based on specific roles, queues and priorities TriZetto's Financial Reconciliation Manager helps Medicare plans identify, track and resolve factors that might cause payment discrepancies in Part C or Part D reimbursement. Financial Reconciliation Manager enables reconciliation analysts to accelerate workflow, increase efficiency and reduce costs in supporting resolution and financial management. One system for Medicare Part C and Part D payment reconciliation Compares plan and CMS membership data to calculate payment and flag discrepancies Prioritizes discrepancies with the most financial impact and provides actuaries/underwriting with key reports and data Assist management with work assignment, workflow management and discrepancy aging Ensures that your organization has the necessary tools to remain in full compliance with everchanging CMS regulations for financial reporting TriZetto's Encounter Data Manager application interfaces with Cognizant's core adjudication systems, such as Facets® and QNXT™, as well as other key data sources to generate and edit the required encounter data submissions for Medicare, Medicaid and Exchanges. These data sources include core claims processing systems, data warehouses and other ancillary vendors. Provides a method of extracting paid claim data from your core claim systems, including ancillary data (for example dental, pharmacy, vision) Manages the Encounter submission and response file process and holds claims that would normally be rejected so the issue can be resolved Includes preconfigured Scrub and Business Rules and gives users the ability to create user-defined Scrus and Business Rules through an integrated

toolkit Speeds new market implementations using preconfigured market essential packages Optional EDI Validator validates WEDI SNIP levels 1-7 utilizing TIBCO Instream Encounter Data Manager includes an Online Provider Editing tool to edit encounter provider and member data at a claim or batch level within the application Extensive standard reporting, dynamic dashboard and access the database for unlimited adhoc reporting TriZetto's Risk Score Manager calculates risk scores utilizing CMS methodology and projects revenues for Part C and Part D. It also reconciles EDPS data. Identifies member HCCs and RxHCCs by payment year and data collection period based on a plan's accepted EDPS data Compares plan HCC Information to CMS information on a member and payment year basis to identify discrepancies Calculates plan Part C and Part D risk scores using plan and CMS demographic and HCC data Identifies claim/diagnosis level RAPS and EDPS data in cases where CMS is missing accepted HCCs/ RxHCCs that can be exported from risk score manager. Provides detailed risk score and HCC related management reports and a dashboard Reconciles submitted RAPS and EDPS data TriZetto's Encounter Data Manager for EDGE Server supports the identification and submission of distributed data (claims, enrollment, pharmacy and supplemental data) to the CMS EDGE Server, as well as the receipt of responses back from the CMS EDGE Server. Comes pre-integrated with Cognizant's TriZetto Facets® & QNXT™ core administration applications Provides an interface from the enrollment and claims data sources to generate and edit files submitted through the CMS EDGE Server to the Department of Health and Human Services (HHS) Assists with scrubbing, masking, submitting and tracking complete files according to the varying HHS submission and format requirements for delivery to the EDGE Server Increases efficiency and supports compliance efforts with accurate submission files and error fixes to better maximize risk scores and deliver higher reinsurance revenue Includes a full suite of required risk adjustment and reinsurance reports TriZetto's ClaimSphere HEDIS solution is NCQA Certified and provides all standard outputs to meet HEDIS® regulatory and compliance requirements. NCQA Certified HEDIS engine for retrospective regulatory reporting Provides self-service BI for prospective gaps in care identification with faster turnaround time Supports administrative HEDIS reporting for both NCQA HEDIS and HEDIS-like state measures and also supports state-specific measures Built-in automated workflow management tool, Cockpit4DIA, ensures accurate and on-time submissions Supports/integrates with all major data sources for administrative and supplemental data and facilitates MRR data integration TriZetto's StarServ analytics reports on current Star Rating scores and provides insights to help plans improve their ratings. End-to-end Medicare Star Rating assessment and improvement platform for CMS 5 Star Program for Medicare Advantage plans Data-driven decision levers objectively prioritize measures and population cohorts that can improve overall Star Rating Actionable business insights to improve Star Rating scores through prospective gaps in care reports and member prioritization algorithms for focused outreach Responsive and easy-to-use interface with role-based dashboards and contextbased drill down to member-specific actionable data Drives collaboration and accountability, derives actionable insights and facilitates continuous quality improvement I would like Cognizant to contact me based on the information provided above.
